Tamagawa Awarded Boeing 777X Sensor Contract

Iida City, Japan based Tamagawa Seiki Co., Ltd. has been selected by Boeing to supply the 777X angler sensor. This is Tamagawa's second contract awarded by Boeing following the 2013 contract to supply the 737 MAX Rotary Variable Differential Transformers Cluster.

The 777 family is Boeing's best seller in the wide body market with more than 1,200 airplanes delivered to airlines worldwide. The latest variant of the 777X is scheduled for entry into service in 2020 and has received more than 300 orders to date. The 777X will be the world's largest and most fuel-efficient twin-engine airplane.

This tier 1 contract with Boeing exhibits Tamagawa's commitment to the company's presence in the commercial aerospace system equipment market and the advancement of the aerospace industry within the Iida region.

Boeing 777X
